1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Perkins '969 in view of Robertson '928.

It is old and well known to place an eyelet in openings formed in a strip of material where an elongated member is running through the openings, for added strength, so that the edges of the opening won't tear, and so the elongated member can pass more easily through the openings. It would have been obvious to one of ordinary skill in the art to place eyelets around the openings "a" in Perkins, as taught by Robertson. Material is generally considered to be a matter of choice and design.

3. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Drower 5,570,794 in view of Perkins '969 and Robertson '928.

Art Unit: 3634

It would have been obvious to modify Drower 5,570,794 (Figure 7) by employing a rod and openings in the continuous strip, as taught by Perkins '969, and to use eyelets to strengthen the edges of the openings as taught by Robertson '928.

4. Claims 1-6 are allowed.

5. The patents to Riciardelli et al, Susoev, and Brown are cited to show similar structures.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert W. Gibson, Jr. whose telephone number is 703-308-2168. The examiner can normally be reached on M-F 7:30 to 4:00.
